OTHER SERVICES

Storage Solutions

CED Nashville can handle your gear, lighting, and wire packages. We manage the receiving, storage, and delivery of material and provide insurance. Which means everything comes together seamlessly. CED Storage Solutions alleviates storage costs, receiving issues, and job site safety (material movement on the job).

Project Management

Your project manager helps keep everything on track. With our customized reporting, there are fewer surprises. Reports include vital information such as estimated ship dates, tracking, delivery, and who signed for the material on your job.

CED can help you get it done!

LIGHTING TAKEOFFS

Lighting Estimating

By outsourcing the quantity takeoff process, clients can increase the number of bids they are able to submit. This is a winning strategy in these competitive times. Imagine being able to submit 10+ bids using the same cost and time as submitting 1 bid.

CED's takeoff services evaluate and calculate the number of light fixtures and controls required to meet plan specifications. These are reviewed by our sales team and customized to meet each individual client's needs. Lighting takeoffs are typically used for bidding, budgeting, or ordering purposes.

Outsource Takeoffs for Lighting

Our estimating team has many years of experience in reading plans. We transform them into easy to use information. CED can deliver accurate takeoffs in a 24-48 hours.

REDUCE COSTS

Save money on today's bid and eliminate future costs by using our takeoff services. CED's skilled team can complete projects promptly and with precision. We measure, count, and figure light fixture quantities as well as control items within the plans. These customized services allow estimators to be more efficient.

CED's specialists provide affordable estimating that helps reduce paperwork and storage. We support large and small contractors on projects of every size. Save time and money by using our takeoff services to eliminate delays.

What is your average cost to prepare a bid? How many labor hours do you lose during the takeoff process?

What errors have manual takeoffs created for you? CED is here to help make sure your projects run smoothly.
